

Now you have had a go at writing equivalent fractions, can you play the pairs game to pair up the equivalent fractions below? Maybe you might want to play this with someone in your house, see who can get the most pairs? You could cut them out and place them in pairs or you could write them like this:

$$\frac{1}{2} = \frac{3}{6}$$

Find the matching pairs.

$\frac{1}{7}$ 	$\frac{12}{15}$ 	$\frac{2}{14}$ 	$\frac{6}{14}$ 
$\frac{4}{16}$ 	$\frac{8}{10}$ 	$\frac{9}{12}$ 	$\frac{3}{4}$ 
$\frac{3}{7}$ 	$\frac{4}{12}$ 	$\frac{3}{12}$ 	$\frac{2}{6}$ 

Find the matching pairs.
