

Topic and Science activities

Week Beginning 29th June 2020

Let us do something slightly different this week. Your activity this week is to teach someone in your house something that you have learnt in both Topic and Science. I have reminded you of all of the topics we have covered in both Topic and Science below. You could teach them in any way you would like, maybe a practical activity. Here is an example of someone teaching their parent all about plants using real parts of plants they had found outside.

Topic subjects we have covered:

Predator!

Scrumdiddlyumptious!

Flow!

Gods and Mortals!

Science topics we have covered:

What plants Need

Movement and Feeding

Forces and Magnets

Parts of Plants

Don't forget to upload your work to Class Dojo, I cannot wait to see what you all come up with.
