

Topic, Science and Spanish Activities

Week Beginning 4th May 2020

Predator

This week, we are going back to our topic: Predator

The Food Chain Of An Owl

A food chain shows the path of energy from one living thing to another. Decomposers like bacteria, are necessary for all food chains.

Remember when we learnt all about prehistoric predators, fossils, skeletons and food chains?

Can you create your own food

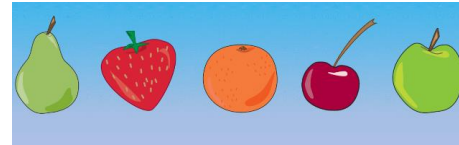

chain using any animals and plants of your choice?

Remember you'll need to have a producer, consumer and a predator.

Science- Plants

Lets focus on seed dispersal. Remember, this is how seeds are dispersed in different environments. Here are 4 different ways that seeds disperse. Pick 2 and research exactly how these work. ----->

Spanish

una manzana una naranja una fresa

una pera una cereza

Here are the names for each of these fruits that we have learnt. Can you remember which one matches with the correct name? After you have matched them, practise trying to pronounce them to push yourself.

You can practise these at home with a member of your family?

How Seeds Travel
